

## **Physicist - Radiotherapy unit in Azores (M/F)**

Become a member of a Radiotherapy unit in Azores, as a Radiophysical.

Integrating the Physics department of the Radiotherapy department, will be responsible for periodically quality controls of linear accelerators, performing Computed Axial Tomography examinations and checking the dosimetry equipment used in external radiotherapy. You will have to prepare and verify the recommended doses by the Physician for the various pathologies of External Radiotherapy and to perform radiobiological calculations, ensuring maximum success in the treatment.

We are looking for a Physics Licensed Professional with high motivation to work in the area of Radiotherapy, valuing previous professional experience, however this will not be an eliminatory factor.

You will have the opportunity to be part of a robust Health Group, committed to innovation and high levels of excellence.
