

Multidisciplinary Management of Non-melanoma Skin Cancer

17-19 October 2024 | Krakow, Poland - Novotel Kraków Centrum, ul. Tadeusza Kościuszki 5, 30-105

New concept

As the incidence of non-melanoma skin cancer (NMSC) increases worldwide, this interactive course highlights the need to improve interdisciplinary collaboration. This course covers everything in the field of NMSC from epidemiology, dermatopathology, surgical and non-surgical treatments, skin radiobiology and skin care during treatment in radical, palliative and supportive care.

Target group

This advanced multidisciplinary course is aimed at radiation and clinical oncologists, dermatologists, surgeons, allied health care professionals and other specialists and trainees who have a special interest in non-melanoma skin cancer (NMSC) and would like to update their knowledge in the multidisciplinary management of patients with NMSC. The course may also be of interest to medical physicists and radiographers who would like an overview of the current practice in NMSC.

Course aims

This course aims to:

- Provide a comprehensive overview of current management options in NMSC
- Highlight the need for improved interdisciplinary collaboration

The course will be interactive through integration of multidisciplinary lectures and more focused debates and case discussions. The faculty includes renowned experts involved in the multidisciplinary treatment of NMSC. It is hoped that the course will serve as a vital reference for all professionals involved in the management of NMSC.

Learning outcomes

By the end of this course participants should be able to:

- Understand prophylaxis, epidemiology and pathology of NMSC with special focus on basal, squamous and Merkel cell carcinoma. Rare skin cancers will also be included.

- Discuss advantages and limitations of imaging modalities used for diagnosis and treatment of NMSC
- Understand indications and limitations of surgical and non-surgical treatment modalities in NMSC
- Develop a deep understanding of best practices in NMSC and provide patients with the best possible treatment, skin care advice and follow-up care
- Understand challenges of palliative and supportive care in NMSC patients
- Have a general understanding of principles in geriatric oncology and integrate geriatric oncology assessment into clinical practice involving NMSC patients
- Summarise the latest developments and gain knowledge of future directions in research and clinical trials in the management of NMSC.

Course content

- Epidemiology, prevention and pathology of NMSC
- The role of imaging in diagnosis and treatment of NMSC
- Surgical and non-surgical treatments
- Physics and mould room input in dermatological radiotherapy and brachytherapy
- Radiobiology of the skin and re-irradiation
- Follow-up and management of side effects during and after skin cancer treatment
- Role of allied health care professionals in NMSC management
- Concept and management of high risk, locally advanced and metastatic NMSC
- Immunotherapy and targeted therapy
- NMSC in special circumstances and rare skin pathologies
- Role of multidisciplinary team meetings in the management of NMSC
- Overview of current research, clinical trials and technical developments in the management of NMSC
- Quality of life and geriatric assessment in skin oncology

ROADMAP

- ◆ MULTIMODAL CANCER TREATMENT
- RADIATION ONCOLOGIST, OTHER SPECIALIST

COURSE DIRECTOR

Agata Rembielak (UK)

TEACHERS

Alessandro Di Stefani (IT)
Damir Kosutic (UK)
Laure Marignol (IE)
Anita O'Donovan (IE)
Susy Pramod (UK)
Luca Tagliaferri (IT)
Anysja Zuchora (IE)

PROJECT MANAGER

Martina Hristova, ESTRO Office (BE)
mhrhistova@estro.org
M +31 650 497 616

WORKING SCHEDULE

Thursday 17th October - to Saturday 19th October 2024

LANGUAGE

The course is conducted in English. No simultaneous translation will be provided.

COURSE ORGANISATION

For any further information, contact ESTRO:
Martina Hristova
mhrhistova@estro.org

TECHNICAL EXHIBITION

Companies interested in exhibition opportunities during this teaching course should contact Martina Hristova, Project Manager
mhrhistova@estro.org
M +31 650 497 616

Prerequisites

Before commencing this course participants should:

- Revise anatomy and histology of the skin and lymphatic system with common drainage routes
- Have at least basic knowledge of main NMSC types and their clinical presentation
- Have at least basic knowledge of standard surgical and non-surgical treatment modalities in NMSC
- Have at least basic experience with radiation therapy in patients with NMSC. If the participant is not a radiation or clinical oncologist (including training post) they should be involved in multidisciplinary case discussions or have special interest in the management of patients with NMSC
- Be prepared to ask questions and contribute to live and interactive discussions

Teaching methods

The course is delivered face-to-face over two and a half days and will include:

- Prerequisite course materials
- Didactic lectures
- Debates and case discussions

Participants will be advised to review the prerequisite course materials and suggested readings on ESTRO Moodle before the course. The prerequisite materials and live lectures create a complete subject unit.

Key words

Non-melanoma skin cancer, multimodality management, surgery, radiotherapy, systemic treatment, immunotherapy, targeted therapy, high risk non-melanoma skin cancer, volume delineation, side effects, cosmesis, quality of life, geriatric assessment.

Methods of assessment

- Multiple choice questions (MCQ)
- Mark-out exercises
- Evaluation form

PARTICIPANTS SHOULD REGISTER ONLINE [HERE](#)

These pages offer the guarantee of secured online payments.

The system will seamlessly redirect you to the secured website of OGONE (see www.ogone.be for more details) to settle your registration fee.

If online registration is not possible, please contact us:
ESTRO OFFICE: education@estro.org

Registration fees

Please check the registration deadline date on our website

	STANDARD RATE	DESK RATE
In-training members *	€ 425	€ 575
Members	€ 575	€ 725
Non members	€ 750	€ 850

REDUCED FEES are available for ESTRO members working in economically less competitive countries. Check the eligible countries and the selection criteria on the website [HERE](#)

ESTRO

ESTRO GOES GREEN Please note that the course material will be available online. No printed course book will be provided during the courses.

Advance registration and payment are required. On-site registration will not be available.

Since the number of participants is limited, late registrants are advised to contact the ESTRO office before payment, to inquire about availability of places. Access to homework and/or course material will become available upon receipt of full payment.

Insurance and cancellation

The organiser does not accept liability for individual medical, travel or personal insurance. Participants are strongly advised to take out their own personal insurance policies.

In case an unforeseen event would force ESTRO to cancel the meeting, the Society will reimburse the participants fully the registration fees. ESTRO will not be responsible for the refund of travel and accommodation costs.

In case of cancellation, full refund of the registration fee minus 15% for administrative costs may be obtained up to three months before the course and 50% of the fee up to one month before the course. No refund will be made if the cancellation request is postmarked less than one month before the start of the course.
